

# WATERWORK

REFERENSCASE IN YSTAD MUNICIPALITY

## BACKGROUND OF THE COMPANY AND PROJECT

We have had problems with condensation in some areas of our buildings. To establish a better indoor climate, in our process control rooms and pump houses we contacted Airwatergreen.

## WHAT PROBLEMS DID AIRWATERGREEN SOLVE?

With the Flex dehumidifiers we now have a better indoor climate and environment in these rooms. We use the function Dew point control available in the FLEX. With Dew point control the dehumidifier is configured to operate in relation to the temperature on the coldest surface, in this way to ensure to avoid condensation. This is even more efficient, when your challenge is related to condensation, than to set the dehumidifier to establish a certain relative humidity level (RH).

## QUICK FACTS

### Product:

4 FLEX INTERGRATE dehumidifiers.

### Installation year:

2018 - 2019

### Reason:

To get a better and maintenance free indoor climate.

## BENEFITS OF USING AWG'S PRODUCTS?

We finally have a good indoor climate in our buildings. This means less maintenance work and that we also save costs on other things in the facility.

"WHEN WE HAVE A GOOD CLIMATE IN OUR FACILITY, THERE WILL BE LESS MAINTENANCE ON OTHER THINGS."
